Lung Cancer and Bronchology Symposium

Course description

A State of the Art Review on Imaging, Diagnosis, Staging and Treatment of Lung Cancer. New technologies aimed at imaging for early lung cancer detection, precision targeting of pulmonary nodules, endoscopic ultrasound for mediastinal staging as well as therapeutic bronchoscopic and pleuroscopic techniques for palliation will be discussed. The course features live demonstration by the experts and allows participants to have "hands-on" experience. In addition there are sessions on lung pathology and its precursors, new international classification for lung cancer as well as research into biomarkers for targeted therapy in the future.

Who should attend

Specialists, trainees in Pulmonary Medicine, Oncology, Thoracic Surgery, Pathology and researchers with interest in lung cancer. CME 4 points will be awarded.
